

## MICRO RAIN

a "Turbine Drive" traveling sprinkler for arena watering!

Micro Rain traveling sprinklers are designed to give you a simple, automated method of applying water to your arena surface. The Micro Rain provides uniform, controlled, fully adjustable, and unattended watering.

All Micro rain sprinkler systems utilize an efficient, maintenance free turbine drive system to retract the hose and cart. The turbine uses the flow of incoming water to generate power. It is combined with a gearbox and optimal drive gear combination to allow fast or slow retraction rates tailored for precise arena watering.

### **MR32**

The MR32 is the IDEAL arena machine!! We created this machine with arenas specifically in mind. A great fit for most any size arena indoor or outdoor. Operates on 7 to 20 gallons / minute. Wetted areas up to 300ft x 130ft.

### **"Turbine Drive" Turbine Powered**

- **Durable & long lasting**
- **Water flow powers hose wind up**
- **All water stays in system**
- **Less maintenance**
- **Easy speed adjustment**

### **MR25**

Perfect for small arenas and operates off most 3/4" hydrants. Requires from 3 to 10 gallons per minute to operate. Wetted areas up to 200ft x 90ft.

### **MR43**

The MR43 is well suited for larger arenas or grass areas of 1 to 5 acres. Operates on 15 to 50 gallons / minute. Wetted areas up to 450ft x 150ft.
